Just What the Dr. Ordered

PRESCRIBED solutions, a new skincare line designed to meet the needs of patients undergoing aesthetic medical and plastic surgery procedures, is also being touted for its anti-aging benefits. Available exclusively in medical offices, each of the line's 12 products—everything from cleansers to anti-aging serums—are customizable in a matter of seconds by a doctor or aesthetician via “booster” infusions that promise to run the gamut of cures from the temporary reduction of inflammation to long-lasting acne relief and increased elasticity.

Launched by two former cosmetic industry executives, David M. May and Aurelian J. A. Lis, the line is currently available at the offices of top dermatologists in New York. To learn more, contact PRESCRIBED solutions at 313 West 14th St., New York, NY 10014-5029; 212-929-9915; info@prescribedsolutions.com.

The 2004 Open days season begins in March. Now is the time to read about the hundreds of private gardens that await your visit.

Each Directory comes with free admission coupon, complete descriptions and driving directions, and a listing of public gardens in each Open Day area.

You may contact Deborah Friedman at (201) 385-9903 or dhfriedman@optonline.net for more information.
