**New "Super-Charged" Beauty Products that REALLY WORK!**  
**THE LATEST NON-INVASIVE PROCEDURES THAT TAKE YEARS OFF**

## Prescribed Solutions

Customized skincare is the mantra behind this line of “high-performance” cosmeceuticals. There are 10 base products in the line—a seven percent glycolic acid cleanser, an anti-aging serum, a two percent hydroquinone lightening serum, and a vitamin K eye therapy, to mention a few. The prescription part comes in thanks to nine additive boosters, such as acne control, rosacea control, antioxidant and anti-inflammatory boosters, which your doctor mixes in, thus tailoring the product to your skin-care needs.

### + FEATURED PRODUCT

#### CUSTOMIZED SKINCARE

##### Surface Improvement

**Exfoliating Polish** is a gentle exfoliator that buffs skin while accelerating cellular turnover. If you're concerned about acne, for example, the doctor can “boost” the polisher (or another product from the line) with a dose of Acne Control booster, which contains active ingredients to control excess sebum. \$25
