## *Get Clear with ThermoClear*

Blast unwanted blemishes in record time with ThermoClear. Ideal for emergency skincare situations (who hasn't gotten a zit just before an important event), this at-home device is the busy gal's savior. No time for a facial? Just zap your blemish with ThermoClear and save face 'til your next spa appointment. This FDA-cleared device by Therative—that really works—provides on the spot treatment via a Thermal Pulse Technology similar to laser technology used by physicians to treat acne. The device delivers a controlled pulse of heat directly to the pimple, accelerating the clearing process without overdrying. It penetrates the skin with a “zap” (which feels similar to a rubber band snap) to neutralize the bacteria that causes pimples. Amazingly, blemishes disappear within 24 to 72 hours. *Find ThermoClear at Sephora stores statewide.*

## *Custom Creams*

These days discerning clients demand the utmost attention, and lines like My Blend by Clarins and PRESCRIBEDsolutions are two of the upscale product lines giving them just that.

It makes perfect sense doesn't it? How can one cleanser or lotion work for all people with dry skin or oily skin? Although a skin type may be common, the intricacies and traits of that person's skin can vary greatly. Enter companies that are changing the way we look at skincare by allowing beauty buyers to create an individualized skin care regime as unique as their own fin-

gerprint. These breakthrough concepts for highly personalized skincare give customers options when it comes to how they treat specific concerns and when and with what they do so.

Dr. Olivier Courtin's My Blend luxury skincare line aptly describes the collection of mixable potions. It offers over 500 possible combinations for discerning customers to customize their program according to age and skin type. The lotions, night creams and cleansers can be combined with add-in boosters that can be incorporated into the basic products that contain eight essential formulas.

PRESCRIBEDsolutions, like My Blend, is a high performance, medical grade skincare product created for customizing. Embraced by dermatologists and cosmetic surgeons, PRESCRIBEDsolutions can work in conjunction with procedures and aesthetic skincare for proven, measurable results. A series of boosters are added to your base lotions and creams by a skincare professional to provide the most efficient form of skincare for you. Find PRESCRIBEDsolutions at Debra Price M.D., Miami and Anushka Spa, Salon & Cosmedical, West Palm Beach. *Find My Blend at Saks Fifth Avenue, Palm Beach Gardens.*

## *Beat Cellulite with Triactive Sonoderm3 (TAS3)*

The quest for cellulite free thighs just got easier thanks to cellulite guru, Anushka's newest breakthrough Triactive Sonoderm3 (TAS3). The latest secret in her renowned cellulite arsenal utilizes 10

computerized programs, which allow cellulite therapists to develop an anti-cellulite regimen that will deliver a targeted triple-action combo of ultrasound, subcutaneous endomassage and pneumatic pressure for results that meet the specific needs of each client.

The TAS3 European technology works fantastically on intervals for the thighs, torso and derriere. Each part of this high-tech treatment, from the penetrating rhythmic waves of the ultrasound to the deep tissue suction endomassage and the lymphatic drainage and microcirculation of the Presso-Jet, works to improve texture, tone and elasticity while decongesting, oxygenating, promoting microcirculation and lipolysis. The ultrasound penetrates the surface of tissue with micro-massage

that enhances the absorption of anti-cellulite serum, while the endomassage stimulates collagen production and increases lymphatic flow. Finally the Presso-Jet aids in the release of metabolic waste and water retention from connective tissue on the targeted zones. The results of TAS3 series are lifted, firmed and regenerated skin tissue for a dimple free derriere. *Try the TAS3 treatment exclusively at Anushka Spa, Salon & Cosmedical in West Palm Beach.*

### ***Instant beauty with colorOn***

A revolutionizing way to apply eye makeup is shaking up the beauty industry. Touted the instant eye make up, colorOn Pro has been amazing makeup artists and makeup lovers alike. (You may have seen it recently on *E!*) The single use, shadow-laden disposable applicators transfer water-resistant, crease-proof eyeshadow color to lids in a snap. Great for busy women or women who travel, this no-mess item easily stores in your handbag or makeup case. Highly pigmented and feasy to apply, colorOn is available in a myriad of color combinations such as Ibiza, Gypsy, Bronze Goddess, Noche, Elle, Sunset Beach and many more. The best part, colorOn is mineral makeup so it's hypoallergenic, too. *Find colorOn Pro at Elevenspa, Delray Beach; Laser Skin Solutions, Jupiter and Lake Worth; Sephora stores statewide and other fine retailers. ▼*
